

1 Put oranges in the basket on top. Maximum: 26 Lb (approx 80 oranges size 113)

2 Press the START button on frontal panel to start squeezing

USE ORANGES
Count
88-100-113-125

3 Press the STOP button to stop the machine at any time.

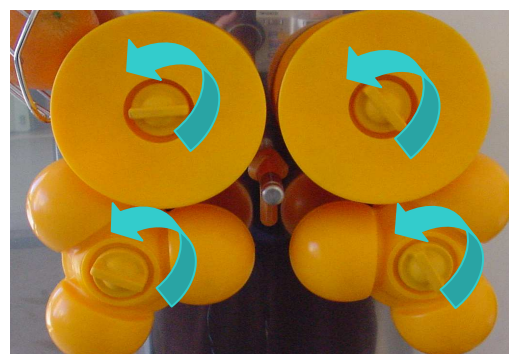

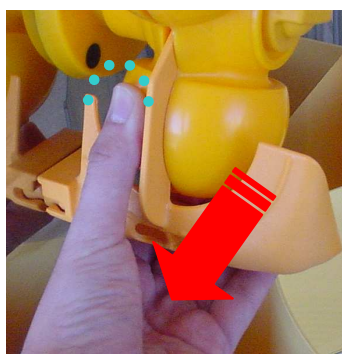

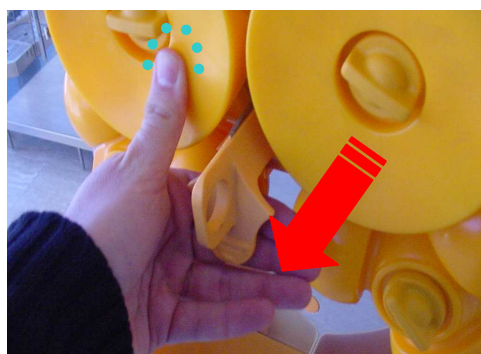

BEFORE START SQUEEZING: CHECK THAT THE 2 PEEL EJECTORS ARE PROPERLY FITTED, AND THE 4 ROTATING WHEELS HAVE THEIR SCREWS SCREWED.

THE MACHINE STOPS WORKING WHEN THE FRONTAL DOOR IS OPENED OR THE JUICE TRAY IS REMOVED

IMPORTANT: EMPTY THE PEEL BUCKETS EVERY 8 JUICES TO AVOID THE PEELS TO GET INTO THE SQUEEZING AREA !

CLEANING INSTRUCTIONS

1 Take off the juice tray and the plastic cover

2 Pull out the knife carefully

3 Remove both Peel Ejectors

4 Remove all the screws and rotating wheels

5 Clean all the parts
Use plenty of water. Do not loose the screws and filters. Parts are dishwasher safe, except for the plastic cover which should be washed with cold water

6

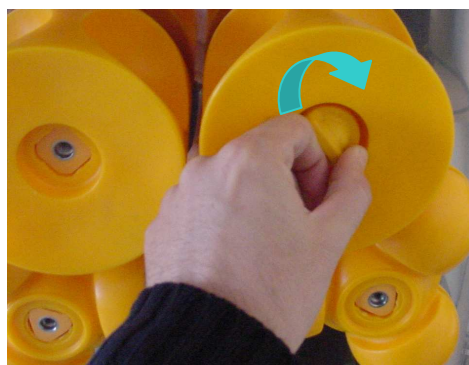

Fit the rotating wheels.

Look at the holes:

Squares with squares, triangles with triangles.

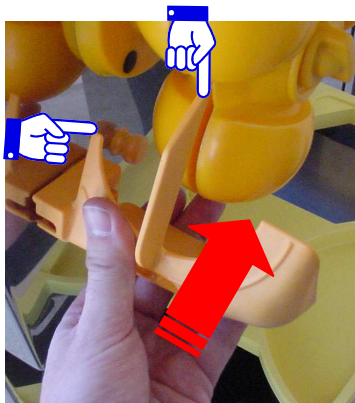

7

Tighten up the screws firmly.

**If any screw got lost
replace it before using the juicer again!**

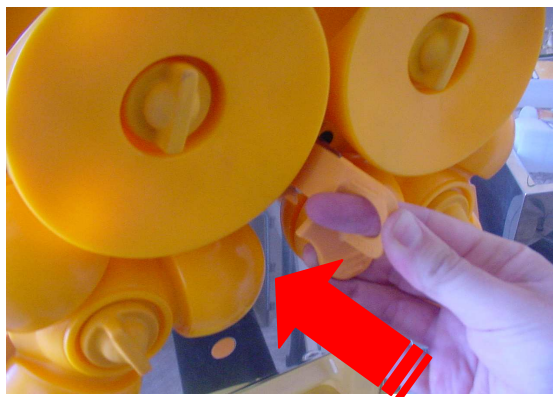

8

Insert both peel ejectors.

**ESSENTIAL! Push the ejectors in fully
to avoid breakages when the machine runs.**

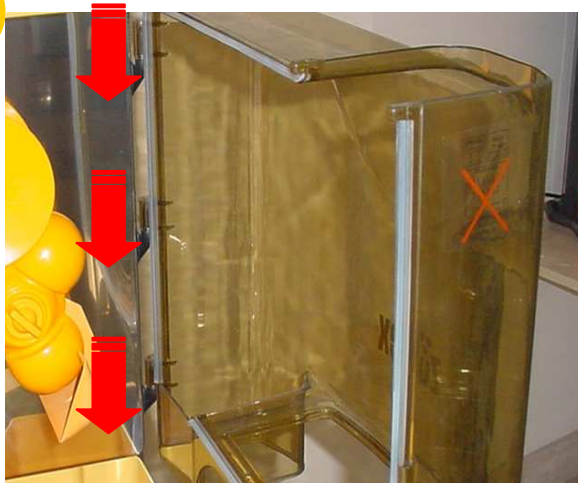

9

Insert the blade.

Push until you hear the 'click'.

10

Put the plastic cover and the juice tray . Remember to put the filter!
